

Table Design

1) Registration Table

Primary Key: regid

Foreign Key: logid

SL.No	Field Name	Type	Description
1	regid	Integer	Registration id
2	logid	Integer	Login id
3	fname	varchar	First name
4	lname	varchar	Last name
5	gender	varchar	Gender
6	dob	date	Date of birth
7	phno	integer	Phone number
8	email	varchar	Email address
9	usertype	Varchar	Type of user (operator or passenger)
	status	Boolean	Status

Login Table

Primary Key: logid

SL.NO	Field Name	Type	Description
1	logid	Integer	Login id
2	regid	Varchar	Registration id
3	uname	Varchar	Username
4	pwd	Varchar	pwd
5	usertype	Varchar	User type
6	status	Boolean	Status

2) Flight Details

Primary Key: fid

Foreign Key: logid

SL.No	Field Name	Type	Description
1	fid	Integer	Flight id
2	logid	Integer	Login id
3	flname	varchar	Flight name
4	bseat	Integer	Number of business seat
5	eseat	Integer	Number of economic seat
6	wseat	Integer	Number of window seat
7	Infantseat	Integer	Number of Infant seats
8	adultamt	Float	Adult cost
9	childamt	Float	Child cost
10	infantamt	Float	Infant cost
11	status	Boolean	Status

4) Book Details

Primary Key: bid

Foreign Key: fid,logid

SL.No	Field Name	Type	Description
1	bid	integer	Booking id
2	logid	Integer	Login id
3	fid	Varchar	Flight id
4	firstname	String	First name
5	lastname	String	Last name
6	dob1	Date	Date of birth
7	gender	Char	gender
8	ctype	Char	Which class business or economic class
9	flightname	varchar	Name of flight
10	flightdate	date	Flight date
11	flighttime	varchar	Time of flight
12	flightfrom	varchar	Source of flight
13	flightto	varchar	Destination of flight
14	status	Boolean	Status

3) **Feedback Table**

Primary key: feedid

Foreign key: bid

SL.No	Field Name	Type	Description
1	feedid	Integer	Feedback table
2	logid	Integer	Login id
3	feedback	Varchar	Feedback
4	status	Boolean	Status

4) **Flight Name Table**

Primary key: flightid

Foreign key :logid

SL.No	Field Name	Type	Description
1	flightid	Integer	Flight id
2	logid	Integer	Login id
3	flightname	Varchar	Flight Name
4	status	Boolean	Status

5) **Admin Addon Service Table**

Primary key:adid

Foreign key: logid

SL.No	Field Name	Type	Description
1	adid	Integer	Add addon id
2	logid	Integer	Login id
3	adname1	Varchar	Name of add on service
4	amount	Float	Amount
5	Status	Boolean	Status

6) **Book Add On Service**

Primary key: bookid

Foreign key: logid

SL.No	Field Name	Type	Description
1	bookid	Integer	Booking id for add-on service
2	logid	Integer	Login id
3	addonservice	Varchar	Selected add-on service
4	status	Boolean	Status

7) User Add-On service table

Primary key: fliid

Foreign key: logid

SL.No	Field Name	Type	Description
1	fliid	Integer	Flight description id
2	logid	Integer	Flight id
3	pnr	Varchar	PNR No
4	Add-onservice	Varchar	Add-On Service
5	status	Boolean	Status

8) Notice Table

Primary key: nid

Foreign Key: logid

SL.No	Field Name	Type	Description
1	nid	Integer	Notice id
2	logid	Integer	Login id
3	notice	Varchar	Notice
4	status	Boolean	Status

11)Packages table

Primary key: pid

Foreign Key: logid

SL.No	Field Name	Type	Description
1	pid	Integer	Package id
2	logid	Integer	Login id
3	placename	Varchar	Place Name
4	description	Varchar	Description
5	pamount	Float	Amount
6	Pimage	BLOB	Image of package
7	status	Boolean	Status

12)Payment table

Primary key: payid

Foreign Key: logid

SL.No	Field Name	Type	Description
1	payid	Integer	Payment id
2	logid	Integer	Login id
3	Cnumber	Varchar	Card number
4	ccv	Varchar	ccv
5	expdate	Float	expdate
7	status	Boolean	Status

13)places table

Primary key: placeid

Foreign Key: logid

SL.No	Field Name	Type	Description
1	placeid	Integer	Id of place
2	logid	Integer	Login id
3	placename	Varchar	Place Name
4	status	Boolean	Status

14)Flight time and date table

Primary key: ftid

Foreign Key: logid, fid

SL.No	Field Name	Type	Description
1	ftid	Integer	Flight time id
2	logid	Integer	Login id
3	fid	Varchar	Flight id
4	source	Varchar	Place name where journey starts
5	destination	Varchar	Place name where journey stops
6	fdate	date	Date of journey
7	ftime	Varchar	Time of flight
8	status	boolean	Status

15) Flight status table

Primary key: flightid

Foreign Key: logid ,fid

SL.No	Field Name	Type	Description
1	flightid	Integer	Flight id
2	logid	Integer	Login id
3	fid	Varchar	Flight id
4	fstatus	Varchar	Status of flight
5	status	Boolean	status
